Customer: Industry Leader in Residential Building Material Distribution & Door Fabrication

Systems Integration

*Parts • Rental • Service
Leasing • Fleet Management*

KEY SAVINGS POINT

*58% reduction in labor cost
\$73,000 in annual labor savings!*

Executive Summary

Palmer-Donavin, an industry leader in residential building material distribution and door fabrication, engaged Top Shelf to help with improving efficiencies in receiving / unloading incoming products.

Challenges

Palmer-Donavin was challenged by having to hand unload and palletize multiple sized and weighted corrugated boxes from top to bottom packed trailers. This time consuming and labor-intensive process required multiple individuals to complete while creating a bottleneck in restocking inventory. With the help of Top Shelf, they opted to explore a single individual and time saving resolution.

Solution

“The biggest problem was that it would take three workers at least eight hours to unload and put away an entire truck totaling to 24 man-hours. Now with the MaxxReach this new total is 10-man hours which is a 14-hour difference with each unloaded truck.” -

-Hunter Hudgins

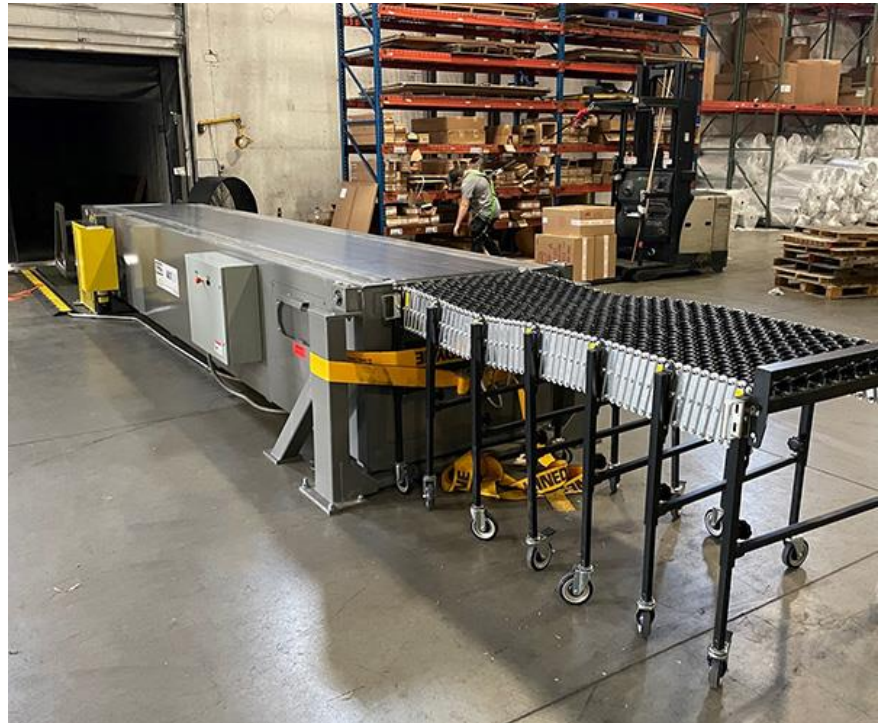

Operations Team Member

Ergonomics & ROI

The Maxxreach also reduces the physical strain on our receiving team members which improves safety, morale, and productivity.

58% reduction in labor cost

MaxxReach Telescopic Belt Conveyor

MaxxReach® telescopic conveyors provide the highest level of productivity for large volume, shipping and receiving applications for any type of distribution center. Automate your loading and unloading areas and convey a variety of products from large or small cartons to loose bags and tires.

Intuitive buttons allow the user quick access to belt operation, lights, movement in and out of the trailer, and can be setup to allow more control as needed.
